↗ **79**/100

Environment   Impact on score ●●●●   ● ↗ 89/100

Environment | Policies   Impact on score ●●●●   ● → 75/100

A policy is a set of objectives that addresses specific sustainability issues. It shows a company's intention to reduce impact, mitigate risk or improve performance.

Strengths

Environmental policy on air pollution
Environmental policy on biodiversity
Environmental policy on materials, chemicals & waste
Quantitative objectives set on energy consumption & GHGs
Formal mechanisms to review and amend environmental policy
Dedicated responsibility for environmental policy
Comprehensive policy on a majority of environmental issues
Environmental policy on energy consumption & GHGs
Environmental policy on water

Improvement areas

Medium priority	Inconclusive documentation for policies on environmental services & advocacy
Low priority	No supporting evidence of a scope of application for environmental policy

Environment | Endorsements   Impact on score ●○○○

●↗ **100**/100

Endorsements are your company's public adherence or commitment to meeting objectives and principles defined by a recognized third-party organization.

Strengths

Endorsement of the Climate Pledge

Endorsement of the United Nations Global Compact (UNGC)

Endorsement of the Science Based Targets initiative - Targets Set

Environment | Measures   Impact on score ●●●●

●↗ **100**/100

Measures are your company's actions to support your sustainability policies and commitments.

Strengths

Work processes or technologies implemented to mitigate emissions of VOC, SO2, NOx or heavy metals

Other actions to manage water efficiency or wastewater discharge

Other actions to mitigate impact from operations on biodiversity

Other actions to manage waste

Carbon footprint calculation programs or services available to customers

Renewable energy or fuel options available to customers

Provision of services to help customers improve their energy efficiency

Provision of information on environmental impacts of energy consumption

Work processes or technologies implemented to mitigate emissions of dust and/or particulate matter

Other actions to reduce energy consumption/GHG emissions

Awareness training of employees on local biodiversity and ecosystem issues

Formal partnerships or research projects to support on-site biodiversity conservation

Environmental emergency measures in place

Actions for labeling, storing, handling and transporting hazardous substances

Traceability system implemented for hazardous substances

Treatment and conditioning of conventional waste to facilitate clean disposal

Actions to integrate biodiversity-promoting features and habitats into the design of operational sites

Actions to prevent emissions of atmospheric pollutants and other environmental nuisances (e.g. noise, odor, vibration, road and light)

Reduction of energy consumption or GHG emissions during transmission activities

Actions to restore, rehabilitate and maintain ecosystem health and functioning after project completion

Training of employees on energy conservation/climate actions

Periodical analysis on the volumes of major air pollutants or ambient air quality monitoring (testing levels of PM, NOx, SO2, VOC or heavy metals)

Formal risk assessment or data-driven analysis of operations having potential impact on local biodiversity and ecosystems

Regular noise measuring campaign (site boundary noise measurements undertaken)

Work processes or technologies implemented to mitigate noise

Reduction of internal wastes through material reuse, recovery or repurpose

Internal sorting & disposal of waste according to waste streams

Energy and/or carbon audit

Purchase of verified carbon offset credits

Fuel switch to achieve higher energy efficiency and/or lower carbon emission intensity

Training of employees on waste reduction and sorting

Purchase and/or generation of renewable energy

Environment | Certifications Impact on score ●●●○ ●→ **100**/100

Certifications confirm your compliance with international standards (for example, ISO 14001, ISO 45001, ISO 37001, SA8000 or FSC Chain of Custody). They must be issued by an external certification body.

Strengths

ISO 14001 certified
ISO 50001 certified
Specific environmental certification
EMAS Certified
Environmental management system certification covers more than 75% of the assessed scope

Environment | Coverage Multiplying factor ● **100**/100

Coverage means the level of deployment of measures and certifications throughout your company. It's a multiplying factor. The higher it is, the higher score will be given to the Measures and Certifications indicators.

Strengths

Supporting documents show an exceptional level of coverage of environmental actions or certification throughout company operations

Environment | Reporting Impact on score ●●●○ ●→ **75**/100

Reporting is based on quantitative KPIs that measure your implementation of sustainability practices.

Strengths

Reporting on total gross Scope 3 GHG emissions
Total gross Scope 3 GHG emissions reporting value confirmed in supporting documentation
Reporting on total gross Scope 1 GHG emissions
Reporting on total gross Scope 2 GHG emissions (market or location based)
Reporting in accordance with ESRS Set 1
Company reports to CDP
Reporting on total gross Scope 3 downstream GHG emissions
Total gross Scope 3 downstream GHG emissions value confirmed in supporting documentation
Total gross Scope 2 reporting value confirmed in supporting documentation
Total gross Scope 1 reporting value confirmed in supporting documentation
External assurance or verification of sustainability reporting
Reporting on total energy production
Reporting in accordance with GRI Universal Standards
Reporting on total energy consumption
Reporting on total amount of renewable energy consumed
Reporting on total weight of waste recovered
Reporting on total weight of non-hazardous waste
Reporting on total weight of hazardous waste
Reporting on total renewable energy production
Comprehensive reporting on environmental issues
Company communicates progress towards the Sustainable Development Goals (SDGs)
Materiality analysis in sustainability reporting

Improvement areas

Low priority	No supporting evidence of reporting on the total amount of water recycled and reused
Low priority	No supporting evidence of reporting on the total weight of air pollutants
Low priority	No supporting evidence of reporting on the total weight of radioactive waste generated
Low priority	No supporting evidence of reporting on the total water consumption
Low priority	Declares some sites/operations located in or near biodiversity-sensitive areas, and the activities negatively affect those areas

Environment | 360° Watch   Impact on score ●●●● → 75/100

Alperia and Edyna, a new sustainable headquarters in Merano [IT]

www.altoadige.it | 17 Dec 2025

On December 17, 2025, Alperia and Edyna inaugurated their new sustainable headquarters in Merano, located strategically near the Maia Bassa train station. This €30 million investment consolidates approximately 300 employees into a unified complex featuring a 22-meter elliptical office tower and a warehouse building with a 2,000-square-meter alpine green roof. Designed by Cecchetto & Associati, the facility emphasizes environmental integration with a 2,500-square-meter water feature and advanced energy efficiency, targeting LEED Gold and CasaClima A certifications. The site includes 100

Alperia SpA

www.fitchratings.com | 04 Apr 2025

On April 4, 2025, Fitch Ratings affirmed Alperia SpA's Long-Term Issuer Default Rating (IDR) and Standalone Credit Profile (SCP) at 'BBB' with a Stable Outlook. This rating reflects Alperia's solid position in the Italian utility and power sector, particularly as a key player in renewable energy. The affirmation extends to its specific securities, including the €500 million Green Bond (maturing 2028) and the €250 million bond (maturing 2029), both maintained at 'BBB'. This follows a positive trajectory from 2024 when Fitch upgraded the outlook from "Negative" to "Stable" due to record EBITDA levels and effective

Alperia: Energy sustainability is in the company's DNA [IT]

www.altoadige.it | 16 Apr 2024

At the 2024 Economy & Sustainability Forum, General Manager Luis Amort reaffirmed Alperia's position as a leader in Italy's energy transition. While rooted in South Tyrolean hydroelectricity, the company is diversifying into wind, photovoltaics, and biomethane to achieve "Net Zero" by 2040. A key driver of this strategy is Alperia Green Future, which utilizes artificial intelligence and "Sybil" predictive technology to optimize energy savings and industrial decarbonization. Alperia is also evolving into a customer-centric "one-stop shop," expanding non-commodity services like electric mobility and energy retrofitting.

Labor & Human Rights | Policies   Impact on score ●●●●   ● ↗ **100**/100

A policy is a set of objectives that addresses specific sustainability issues. It shows a company's intention to reduce impact, mitigate risk or improve performance.

Strengths

Exceptional policies on major labor and human rights issues

Labor & human rights policy on external stakeholder human rights

Quantitative objectives set on working conditions

Quantitative objectives set on employee health & safety

Dedicated responsibility for labor and human rights policy

Labor and human rights policy scope of application specified

Formal mechanisms to review and amend labor and human rights policy

Labor & human rights policy on social dialogue

Labor & human rights policy on working conditions

Labor & human rights policy on employee health & safety

Labor & human rights policy on career management & training

Labor & human rights policy on preventing discrimination and harassment

Quantitative objectives set on preventing discrimination and harassment

Labor & Human Rights | Endorsements   Impact on score ●○○○   ↗ **75**/100

Endorsements are your company's public adherence or commitment to meeting objectives and principles defined by a recognized third-party organization.

Strengths

Endorsement of the United Nations Global Compact (UNGC)

Labor & Human Rights | Measures   Impact on score ●●●●   ↗ **100**/100

Measures are your company's actions to support your sustainability policies and commitments.

Strengths

Actions to prevent discrimination in professional development and promotion processes

Employee satisfaction survey

Health care coverage of employees in place

Compensation for extra or atypical working hours

Stakeholder engagement with affected communities to address human rights issues

Collective bargaining agreement on working hours, overtime, or leaves

Actions to ensure equal pay for equal work

Grievance mechanism on external stakeholder human rights

Actions to promote the inclusion of employees with disabilities

Grievance mechanism on discrimination and/or harassment issues

Employee resource or support groups open to all

Collective bargaining agreement on career management & training

Actions to prevent discrimination during recruitment phase

Employee representatives or employee representative body (e.g. works council)

Family Friendly programs (FFPs) implemented (e.g. parental or care leaves, childcare services or allowances)

Other actions to promote structured social dialogue

Awareness training on discrimination and harassment

Actions to prevent workplace harassment

Actions to control hazardous substance exposure

Actions in place to ensure health and safety of non-employee workers and other contracted workers on premises

Actions to ensure adequate wages

Flexible organization of work (eg. remote work, flexi-time)

Human rights impact assessments performed to identify potential or actual impacts on external stakeholders

Employee health and safety emergency action plan

Equipment safety inspections or audits

Grievance mechanism on working conditions

Collectively bargained wages

Actions to manage working hours and overtime

Actions to promote equal opportunities for all in the workplace

Third-party worker voice survey

Training of employees on health and safety risks and best working practices

Complaints procedure in place for employees to report on occupational health and safety issues

Actions to prevent noise exposure

Skills development program tailored to employee needs

Employee health & safety risk assessment
Regular employee health check-up
Actions to address stress and psychological wellbeing in the workplace
Regular assessment of individual performance
Individual development and career plan for all employees

Improvement areas

Low priority	No supporting evidence of actions to promote internal mobility
Low priority	No supporting evidence of training on external stakeholder human rights

Labor & Human Rights | Certifications Impact on score ●●●○   ↗ **100**/100

Certifications confirm your compliance with international standards (for example, ISO 14001, ISO 45001, ISO 37001, SA8000 or FSC Chain of Custody). They must be issued by an external certification body.
